No.

28

NOTES

The legend of the Jersey Devil has haunted the mythical Pine Barrens of Southern New Jersey since the 1700s. The head of a goat sits atop a seemingly random hodgepodge of hoofs, wings and horns—accompanied by a forked tail and a scream made famous over the centuries. Despite its distressing appearance and the fearful nature of its behavior, the Jersey Devil is said to be very self-conscious, likely due to unrealistic ideals perpetuated by the fashion media. Locals and travelers are advised to avert their eyes and avoid judgy remarks.
